

The Player's Guide

How a poker night works on your phone: one account, one code at the door, slips at the bank, and one number at the end. Everything else takes care of itself.

The whole night on one page

BEFORE THE NIGHT • ONCE

ON THE NIGHT • 18:00 TO 20:30

IF YOU RUN LOW • OPTIONAL, ONCE PER NIGHT

AT THE END • OR ANY TIME BEFORE 09:00 TOMORROW

Dashed arrows are optional paths. Gold boxes are the moments you show your phone to an organiser.

The one idea behind everything: chips move only against a slip on your screen, and points move only from what gets reported. The app never interrupts the poker; it shows up at the door, at the bank, and at the end.

Before the night

1 · Create your account

Go to storeblindernpoker.org, tap **Member login**, then **Create account**. Email, a password, and your full name. The name is seen by organisers only, never published: student association funding is counted in real members, so it matters that you exist.

2 · Claim your pseudonym

Your pseudonym is your public identity: it is all anyone sees on the leaderboard. Played before? Your old name is reserved for you, just take it. New? Pick anything, 2 to 32 characters, first come first served.

Deadline: pseudonyms lock for the semester when Round 1 starts, **Friday 4 September at 18:00**. Until then you can change your name freely on the login page. After that it is yours until next season.

3 · RSVP, if you like

On the **Events** page, tap **Going**. Signed-in members see who else is coming; the public only ever sees a count. We use the number to set up the right amount of tables and chips, so it genuinely helps.

The screenshot shows the 'Member login' screen of the 'Store Blindern Poker' app. At the top, there's a header with the app name and a menu icon. Below the header, the title 'Member login' is followed by a paragraph: 'One account for the whole club: check in on Friday nights, report your chips, follow your season points. Free to join, points only.' There are two buttons: 'Sign in' and 'Create account'. The 'Create account' button is highlighted. Below the buttons, there are three input fields: 'Email' (with the placeholder 'you@example.com'), 'Full name' (with the placeholder 'Kari Nordmann'), and 'Password' (with a masked input). Below the password field, there's a note: 'At least 6 characters. No confirmation email is sent; you are in straight away.' At the bottom, there's a 'Create account' button.

Create account: email, password, full name.

The screenshot shows the 'Member login' screen of the 'Store Blindern Poker' app. At the top, there's a header with the app name and a menu icon. Below the header, the title 'Member login' is followed by a paragraph: 'One account for the whole club: check in on Friday nights, report your chips, follow your season points. Free to join, points only.' There are two buttons: 'Sign in' and 'Create account'. The 'Create account' button is highlighted. Below the buttons, there's a section titled 'Pick your pseudonym' with a paragraph: 'Your pseudonym is the only name ever shown in public: on the leaderboard, on this site, anywhere. Played with us before? Type the pseudonym you already use to reconnect with your seat.' Below this, there are two input fields: 'Pseudonym' (with the placeholder 'Night Hawk') and 'Full name' (with the placeholder 'Your real name'). Below the 'Full name' field, there's a note: 'Only organisers ever see this. We keep it for membership records: student association funding is counted in real members. Your pseudonym is the name everyone else sees.' At the bottom, there's a 'Claim pseudonym' button.

Claiming a pseudonym. Green means available.

At the door: check in, get chips

There is a QR code and a 5-character code on the screen at the front of the room. Scan it, or open the site and type it. That is your check-in: it proves you are in the room, credits your **+5,000** attendance bonus, and books your buy-in.

The buy-in slip

The moment you check in, your phone becomes a slip. Show it at the bank; the organiser reads one number and hands you that many chips. Usually 10,000, but not always: on a chip-short night, or if your points are low, the slip shows what you actually get. **The slip is right, habit is not.**

The clock on the slip ticks live, so a screenshot from last week convinces nobody. Closed it too early? There is a **Show my buy-in slip** button until the night ends.

No phone, dead battery, no data? Find an organiser. They check you in and report for you from their console. Nobody misses a night over a battery.

The code arrives by QR or by thumb.

The buy-in slip. Show it, get chips, sit down.

Running low: the top-up

Once per night you may top up: buy more chips with your season points, but only back up to the night's stack. Holding more than a full stack? Then no top-up, that is the rule, and the app enforces it.

1. Tap **Top up at the bank** on the night screen.
2. Type the chips you are actually holding. Count first.
3. The app answers with what you may take. Take all of it or less.
4. Confirm, and show the slip at the bank.

In the example here, a player holding 3,000 on a 10,000 night may take up to 7,000. The slip says so, and says what the stack becomes, so the bank never does arithmetic at a busy moment.

Points, not money. A top-up spends your season points one for one. There is nothing to pay, tonight or ever.

Declare your chips, see your ceiling.

The top-up slip: amount, and the stack it becomes.

The end: one number

When you are done, count the chips in front of you and type the total. That is the whole report. If the bank recorded your top-up, it is already filled in and cannot be edited: the live number is the truth.

Busted out? One tap on **I busted** and you are done. No shame on the leaderboard, the attendance bonus still counts.

The review screen shows the night's ledger before you send: bonus in, buy-in and top-up out, final stack back in, net for tonight. Check it, send it, get a receipt.

Left in a hurry? Reporting stays open until **09:00 the next morning**. Tram, kebab queue, breakfast: all fine. After that, an organiser enters it for you.

On weak wifi the report queues on your phone and sends itself when the connection returns. If it truly cannot send, the phone shows the numbers in large type: show that to an organiser and it is handled.

Final stack, plus the bank's top-up, read-only.

The ledger: check the maths, then send.

The points, and the questions everyone asks

How a night changes your score

EVENT	POINTS	NOTES
Season start	40,000	Everyone. Join in week 6 and you also start on 40,000.
Turning up	+5,000	Credited before anything else, every night.
Buy-in	-10,000	Or less, if the night runs a smaller stack or your points are low.
Top-up	-what you took	Once per night, only back up to the night's stack.
Final stack	+what you hold	The number you report.

Points never go below zero, so nobody is ever locked out: even at rock bottom, the bonus buys you a seat. The season resets each semester; champions keep their title forever.

Quick answers

Wrong code?	Check the screen at the front, or ask an organiser to check you in.
Phone died mid-night?	An organiser checks you in and reports for you. The paper sheet on the table is always enough.
Reported the wrong number?	Report again before 09:00: the newest report wins. After that, ask an organiser.
Can I RSVP and not come?	Yes. An RSVP is intent, not attendance. Only checking in counts.
Who sees my name?	Organisers only, for membership records. The leaderboard and everything public show your pseudonym.
Is any of this money?	No. Points cannot be bought, sold, transferred or cashed out. They exist on our leaderboard and nowhere else.

For organisers, in one paragraph

The console at /admin runs the night: create it, open it, put the code on the TV, watch who has not reported, enter results for anyone phoneless, and settle when the numbers are in. Settling publishes the leaderboard. Chip counts that do not balance are flagged, never blocking: fix them during the week with an adjustment, visible in history. Super admins can grant and revoke organiser access from the Members section.
